

Balanced Data Management

Christian Rasmussen
Big Data Lab Analytics & AI

Goal for this presentation

- Learn how Grundfos live the permanent change.
- Learn how Grundfos combine FAIR Q and core functions to scale data quality.

Christian Rasmussen
Senior Manager
BigDataLab

Our Promise: **Be – Think – Innovate**

*Pumps consume
of the world's
electrical energy*

10%

*This could be
reduced by*

4%

*by applying state of
the art Grundfos pumps*

And with climate changes - now more than ever...

 Pumps provide and remove water. This is essential to life on earth

THE ENTERPRISE DAIR* DILEMMA

(*DATA/AI READY)

Use case agility,
fast to operational
value with minimal
upfront investment

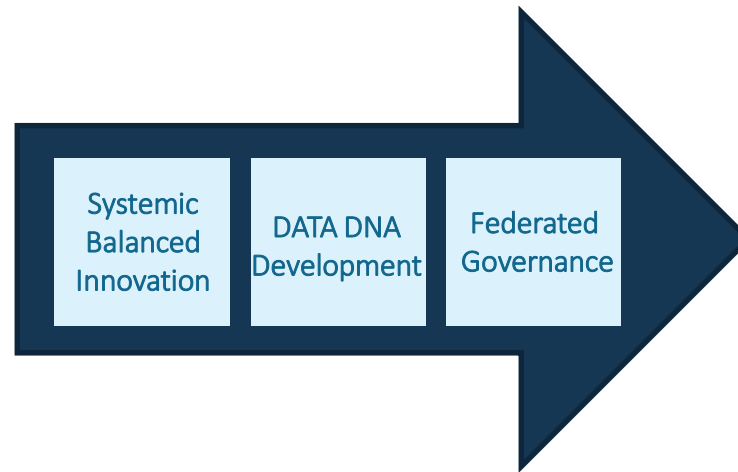

Enterprise DAIR
capabilities:
broad adoption,
synergies, scaling,
re-usability

What is good data quality?

“The level of quality of data represents the degree to which data meets the expectations of data consumers, based on their intended use of the data”

Laura Sebastian-Coleman

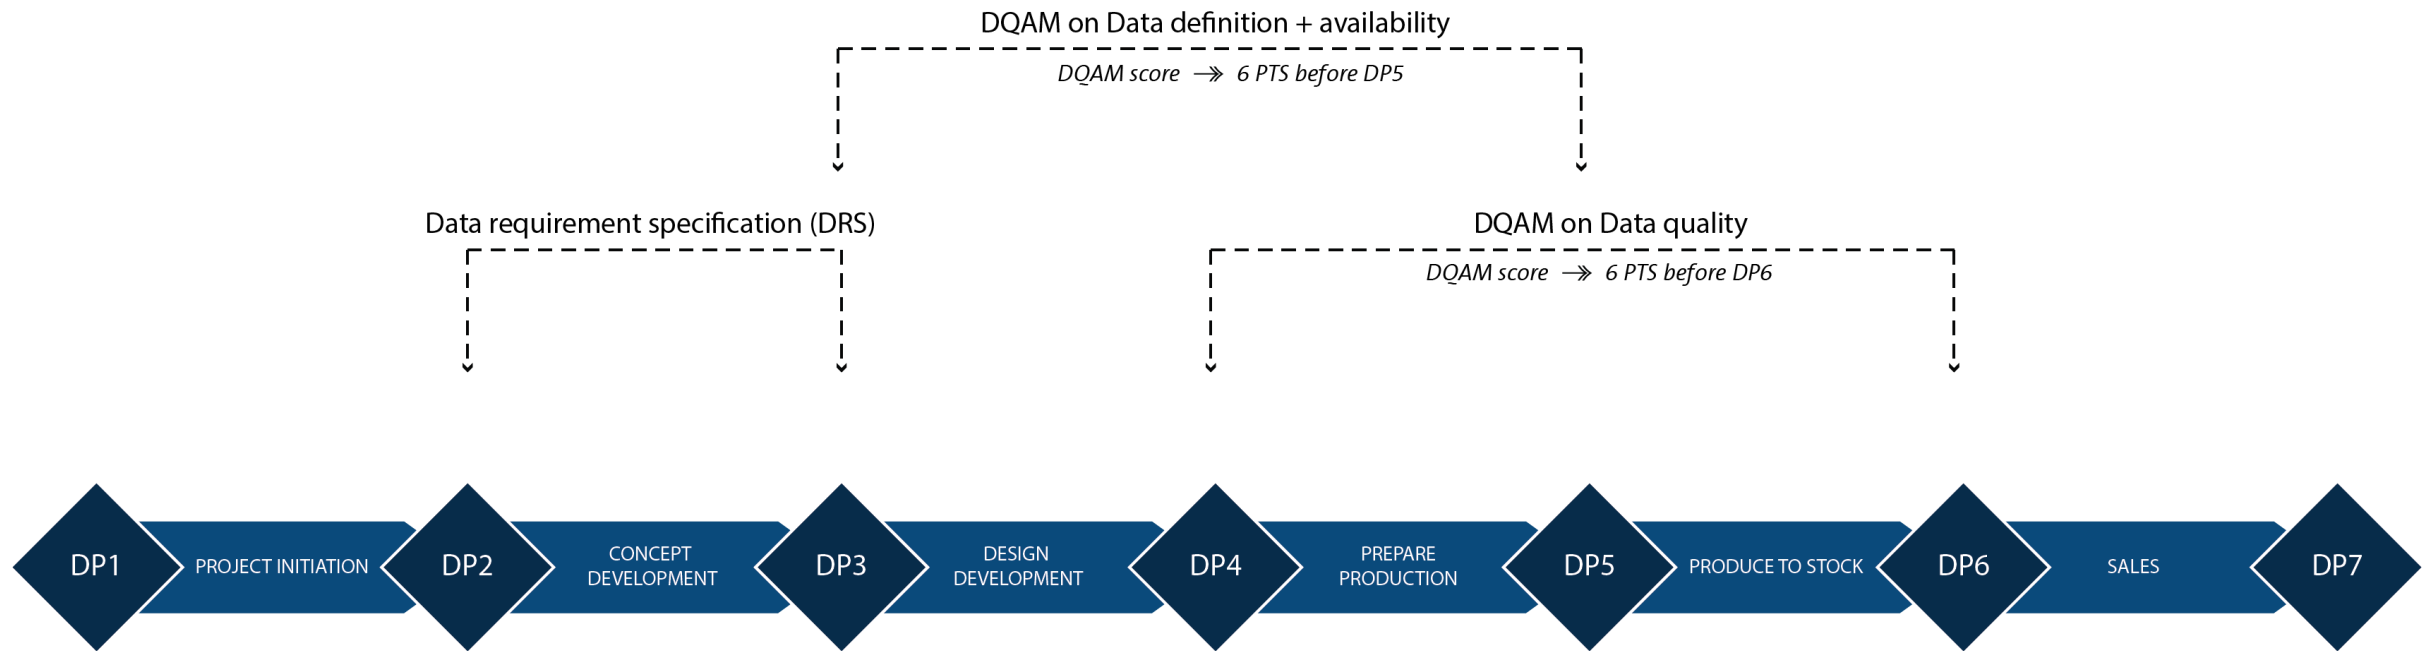

Data Quality Assessment Method

- 1) Identification of stakeholders
- 2) Identification of persons who will be responsible for findings and commitment
- 3) Mapping of data model
- 4) Assessments sessions
- 5) Handover of report to identified persons from step 2
- 6) Identified persons will delegate improvement tasks – and data quality improvement will begin

Implementing data quality requirements into the development process

Our Purpose

Grundfos is a global leader in advanced pump solutions and a trendsetter in water technology. We contribute to global sustainability by pioneering technologies that improve quality of life for people and care for the planet.

THANK YOU
